

Sirvėta Regional Park was founded in 1992 in order to preserve the moraine watershed landscape of the rivers Dauguva and Žeimena in Švenčionys region, the values of its natural ecosystem and cultural heritage. The system of rivers, streams and lakes lying on the height of Švenčionys, Sirvėta Regional Park belongs to the watershed of rivers Dauguva and Nemunas.

The eastern-western Čiūlėnai ridge, which is rising 273 m above the sea level, divides valleys of Miškinis-Ilgis-Šventa-Beržuvis and Kančioginas-Sirvėta-Sėtikė. A stream connects the lakes of the latter that winds in Sirvėta landscape reservation and changes its name from time to time - Žeimenėlė, Sirvėta, Kančiogina, Erzvėta and Birvėta...

The spring “Lino verdėnė” spurs out from the entrails by the lake Sėtikis. Adamavas and Stanislavovas long-lived oak trees that are unique in their form, shade of lindens, Neversčiai ash forests are the sites having extraordinary significance to the world-view of our ancestors who lived here. Four mounds testify the culture that has been created and cherished by our ancestors; the villages located closely are still named after them, such as Aučynai, Rakšteliai, Kačėniškės and Stūgliai. Besides, the old sacred places – Rakšteliai and Garniai old place of worships and Šventa and Juodeliškės barrows are located in forests.
